Objective I wish to develop world-class commercial software.

Qualifications

I have over 20 years of experience writing quality software. I have accumulated expertise in all aspects of software engineering to create and maintain world-class cross-platform software.

Education

1982-1990 Certificate in Data Processing, Champlain College, Lennoxville

Experience

1986-2002 Senior Software Engineer, Claris Corporation/Apple Computer Inc.

I am a major contributor to all major and minor releases of ClarisWorks 5 & AppleWorks 6 for MacOS Classic, MacOS X and Windows products. It is an integrated office application. ClarisWorks/AppleWorks is the most successful Macintosh application ever created. It has won awards and kudos from all sections of the industry, both in the Macintosh and Windows world.

1994-1996 Managing Director Of Technology, Motion Works Group Limited

I was vice-president of a multi-media company that created content creation tools as well as multi-media titles. My responsibilities included product design & implementation. I also guided all team members in designing and coding products for the company, as well as set company policy and direction.

1993-1994 Senior Software Engineer, Chancery Software Ltd.

Co-designed, implemented and released a three-tier client server student information system. I was involved in the server, middle-ware, as well as the clients software. This system involved OS-400 & OpenVMS as servers, Novell Netware as middle-ware, and Macintosh & Windows as clients.

1991-1993 Software Engineer, FAMUS Research Project

I was responsible for designing and implementing a communication system linking 200 doctor's computers and a central database system. This system included data transfer, client software updates and remote debugging

capabilities.

1987-1991 Software Engineer, Le Groupe Teknika

I was responsible for implementing a land surveying system, as well as designing and implementing software for use inside and for sale outside of the company.

1985-1987 Software Engineer, Logiciel Visiontronique

I designed and implemented a database management application for consumer use on the Commodore-64. This was released as CardTex-64. This was my first experience with writing commercial software.

1981-2002 President, Woolsoft

This is my hobby software company. I've been writing software under contract and for entertainment, as well as shareware and freeware applications since I got my first computer.

Honors

I was a major contributor to the first-ever simultaneous cross-platform release of ClarisWorks in its history.
